**Antique Slot Machine Part Co
920-622-5959**

Antique Slot Machine Part Co. originated out of a twenty-five year interest in coin operated machines. As collectors of antique machines we have seen a growing demand for originality in restoring antique machines. We are constantly looking for and acquiring original parts, but also have recognized the need to supply good quality replacements so a machine can be put together in operating condition. The parts offered for sale are sold for the purpose of repairing and restoring antique machines.

The parts pictured in the first part of this catalog are the most commonly replaced parts in restoring machines. In the latter part we have pictured almost every internal part for the Mills and Jennings machines. All of the Mills and most of the Jennings parts are available on request. If you have a Pace, Watling or Caille machine and cannot find the part you need in this catalog, please request a part manual for your specific machine to help identify the part you need.

For your convenience we are selling parts, castings and cabinets in various stages of restoration. This allows you the option of assembling a machine from parts or combining a restored mechanism with unrestored castings and an unfinished cabinet. We do offer an excellent selection of restored slot machines and other related antique coin operated machines.

If you have any questions as to what you might need, give us a call or stop by, we would be happy to help you in whatever way we can. We are open to buying, selling, trading or making a deal with you. We would like to thank you for your enthusiasm in collecting coin operated machines and are looking forward to working together in the future to further our unique hobby. Slot machines are destined to become prized possessions, conversation pieces in our homes and excellent investments to play.

TABLE OF CONTENTS
