

THE NEW PACE "ROYAL COMET"

Designed for locations that demand the best and for operators that want the best. Suitable for clubs, taverns or any location where you want to furnish the finest equipment.

The PACE "ROYAL COMET" has no competition. There are imitations, but none that can compare with the beauty and quality of this machine.

Solid, massive, walnut cabinet, trimmed in gold, aluminum and chrome finished trimmings. The last word in modern design.

Equipped with our patented invisible money drawer. Compare this feature with other makeshift drawers. Lower compartment fitted with rear door and lock. Can be filled with sand bags which answer the purpose of the steel safe stand. Note the location of the operating handle. This affords better leverage and the proper "feel" for playing machine.

The easy handle pull will appeal to the ladies. The location of the handle also allows two or more machines to be placed or fastened together.

Machine is silent in operation. The mechanism has all of the latest proven and dependable features incorporated in our "ALL-STAR" COMETS. The one-piece patented dial escalator is your protection. The "ROYAL COMET" can be had in Penny, Nickel, Dime, Quarter or Half Dollar Bells or Venders.

You must see this machine to fully appreciate the beauty and the possibilities for operating the New PACE "ROYAL COMET".

On display at your distributor or write for our free trial offer.

THE PACE "ALL-STAR" COMET BELL

MR. OPERATOR—

We both lose when your machine is out of order. To get the best results and increase the life of your equipment, follow these simple instructions and get the 100% profit to which you are entitled.

SETTING UP MACHINE—Remove Door and Mechanism and fill Payout Tube with tokens or cash. Fill Jak-Pots to capacity as this will make a better display or cash. Fill Jak-Pots to be used but it is quicker to load Tube and Jak-Pots by removing mechanism. Replace Mechanism and Door and the machine is ready for use.

TO REMOVE MECHANISM—Remove rear Door, remove Screw at coin-head, remove Thumb-Screw at rear of base, lift Brackets on both sides of cabinet and slide mechanism out.

CAUTION—When replacing mechanism be sure that the Top Payout Slide is forward in normal position, otherwise Jak-Pot Trip-lever MB-206-X will fail to hook up with Jak-Pot. It is advisable to play mechanism once before placing it in cabinet.

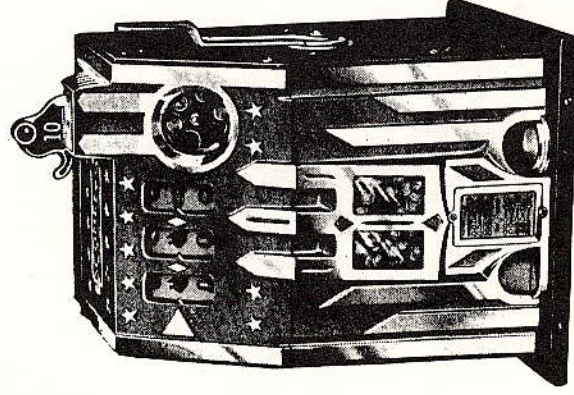

OILING NECESSARY FOR BEST RESULTS—Machine should be oiled small parts with 3-in-1 or sewing machine oil. Use oil sparingly as too much oil is as bad as none. Use vasoline on heavy rubbing parts, such as: Stop-levers, Reel Discs, Kick-Off Dog, Handle-Cam, Clock-Arm, etc. Do not get oil in coin-head or on payout slides. These must be free from oil and it is advisable to remove payout slides and front half of coin-head occasionally and clean with gasoline. Do not flush clock with oil. Dip a straw or tooth-pick in 3-in-1 or sewing machine oil and apply sparingly to each bearing.

DO NOT SPEED UP REELS—If the reels stop with a jolt it puts unnecessary wear and tear on the entire mechanism. Keep Brake Wires adjusted so that reels almost come to a stop as the Stop-levers fall into place.

TO EMPTY MACHINE—Play the machine and hold back Horizontal Payout Levers B-261 to B-266. Repeat until Tube and Jak-Pots are empty.

IF NECESSARY TO ORDER REPAIR PARTS—Give machine number, part number and the coin denomination. We manufacture many types of machines and the correct information will enable us to fill your order promptly.

FOR PROPER PAYOUT—If you are using Tokens, order them from us. We make the only Tokens which are uniform and held to U. S. Standard.

The new Pace ALL-STAR COMETS are the finest machines ever made. They represent a supreme achievement in design, engineering and manufacture. They absolutely meet the requirements of today and present instant appeal to the player. The player is held by the smooth, silent and easy operation of the machine. A perfected mechanism insures uninterrupted service. In other words, the ALL-STAR COMETS have all of the essential features necessary for successful and profitable operation.

The ALL-STAR COMET bells and side venders are furnished in lustrous royal blue with yellow trim and polished chrome.

GUARANTEE: All Pace Products are guaranteed against faulty workmanship. Machines are shipped subject to our liberal 10 Day Trial offer. Money refunded in full if for any reason you are not absolutely satisfied. Write or wire your nearest distributor for prices.

Designed for cash play. Made in Penny, Nickel, Dime, Quarter or Half Dollar Play. Special or Foreign Coins to order. Mystery or Standard Payout.

ACCURACY AND PRECISION DOMINATE IN ALL PACE PRODUCTS.

**THE PACE MANUFACTURING COMPANY

THE PACE "ALL-STAR" SIDE VENDER

Designed for Use with Mints and Tokens

The ALL-STAR COMETS are money-makers and the following exclusive features guard your profits.

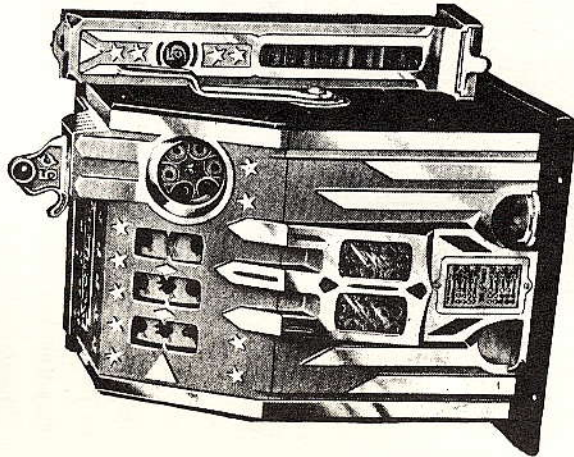

Notice the original exclusive Pace dial escalator, which has only one moving part. Coinhead is equipped with a second coin return, making it impossible for two coins to touch each other; no dogs or springs to wear or get out of adjustment. Its construction absolutely prevents lapping or clogging of the coins.

The large, flashy Twin Jak-Pots are an instant attraction to the player. The Jak-Pot mechanism itself is the simplest and most fool-proof found on any machine. Capacity of the Jak-Pots is easily adjusted.

Our exclusive design of the star wheel on the reels absolutely prevents bouncing of the reels, giving an even spin with a snappy stop. This feature insures positive payout and prevents any arguments due to reels stopping between symbols.

Pace precision-made payout slides, with the tongue and groove features, prevent coins from locking in the slides. The 7th safety slide prevents robbing by means of wires or other methods.

Equipped with No Pay on check feature so that cash payout can be used when desired.

*Made in Penny, Nickel,
Dime, Quarter or Half Dollar
Play. Mystery or Standard
Payout.*

All Penny Play Side Venders vend ball gum instead of mints.

OUR LIBERAL TEN-DAY TRIAL OFFER WITH MONEY REFUNDED
IN FULL IF NOT SATISFIED, IS YOUR GUARANTEE.

PACE "ALL-STAR" GOLD AWARD

SIDE VENDER

Showing skill control feature—same machine as the All-Star Bell excepting that it has the added feature of paying out a Gold Token redeemable at one hundred to one or whatever amount stated on reward card. Gold Award can be furnished on Bells or Side Venders only, with or without skill control.

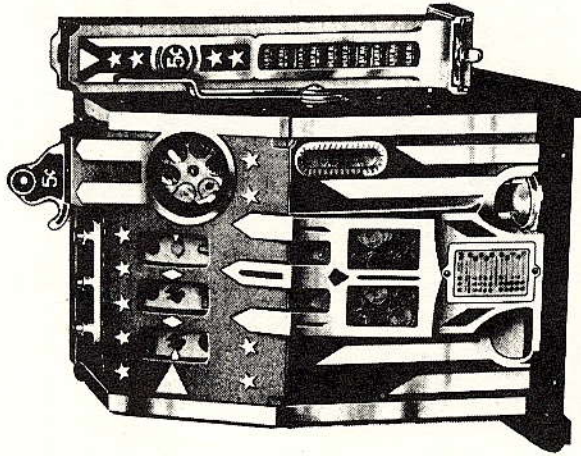

The beautifully designed modernistic top and front make the ALL-STAR COMETS most attractive in appearance. This new design with beautiful color combinations will blend with any surroundings.

The operating handle on all Pace Comets is pneumatically controlled, which takes the strain off the entire mechanism, cushions the handle, and eliminates unnecessary noise.

The special Pace clock is built with utmost precision and subjected to rigid inspection. As a result, the entire mechanism and reels are always perfectly timed.

The All-Star Gold Award is finished in lustrous orange with blue trim and polished chrome.

Order a machine today for inspection and test, convince yourself that the ALL-STAR COMET is the best value for your money.

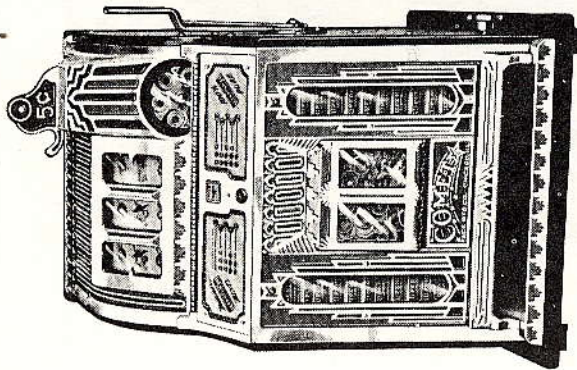

*Made in Penny, Nickel,
Dime, Quarter or Half Dollar
Mystery Pay only. Special or
Foreign coins made to order.*

All Penny Play Side Venders vend ball gum instead of mints.

THE EXCLUSIVE PATENTED DIAL ESCALATOR PROTECTS
YOUR PROFITS.

THE PACE COMET FRONT VENDER

The Front Vender is especially made for the dispensing of mints and the use of tokens or cash. Has two spacious racks for mints, affording a good display in territories where the display of mints is necessary.

The mechanism is of the same high quality as our "All-Star" Comets, built to give years of service.

Our new and simple check separating device on the Side and Front Venders, is positive in action and insures proper separation of checks and money. Machines can quickly be changed from cash to check play, or vice-versa.

Side and Front Venders furnished with Fortune-telling strips unless otherwise specified.

Made in Nickel, Dime or Quarter Play. Special or Foreign coins to order. Mystery or Standard Payout.

COLLECTION BOOKS

We have designed a special Operator's Collection Book and owing to the volume that we sell we are in a position to save you money on this item. 50 triplicates to a book. Books have individual serial numbers and pages are numbered consecutively. We handle these only as an advertising feature, furnishing them at cost plus the handling. Price 75 cents per dozen.

YOU CAN SEE ANY OF THE PACE PRODUCTS AT YOUR NEAREST DISTRIBUTOR.

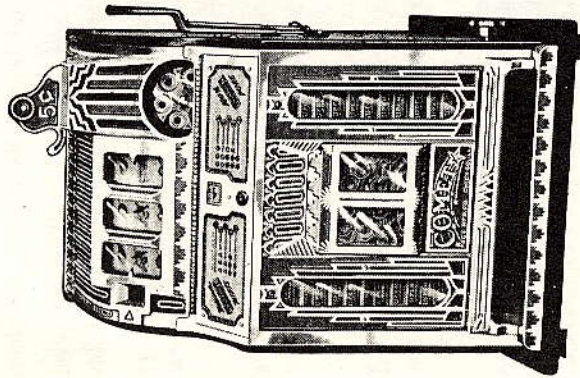

PAGE "DEFERRED PAY" FRONT VENDER

This machine is the same as the Pace Front Vender except that the player knows in advance what he will receive for his nickel or token.

The dial in the small window to the left of the reels registers the amount that will be paid on the next play.

The "deferred pay" is only used in territories where the law compels the use of this feature.

Can be set to pay cash or tokens. They can also be furnished with the skill control feature as shown on page 5.

Made in Nickel, Dime or

Quarter—Mystery or Standard Payout.

Pace has made many other important improvements on the ALL-STAR COMETS aside from the special features listed, with the result that the ALL-STAR COMETS offer to the operator the most dependable and most outstanding machine on the market today.

Write or wire the factory or your nearest distributor for prices.

PACE COMET CABINETS ARE MADE OF SOLID OAK.

DON'T!

Think PACE COMETS are complicated. They are not. PACE COMETS are designed to give maximum service. Our policy is to eliminate unnecessary parts. The fewer parts — the less chance the machine has of giving trouble. Give your machine a few hours study, learn the functions of the various parts and the principle involved and you will be really amazed at its entire simplicity.

DON'T forget that everything mechanical must be understood before you can make proper adjustments and repairs.

DON'T forget that the finest watch or the finished automobile requires occasional inspection and lubrication.

DON'T tinker around here and there — just guessing — as you will do more harm than good. Know what your trouble is. **BE SURE YOU ARE RIGHT — THEN GO AHEAD.**

DON'T let any jackleg go monkeying with your machine — as it will only mean more trouble for you.

DON'T fail to study this manual and at the least sign of trouble — fix it then — do not wait.

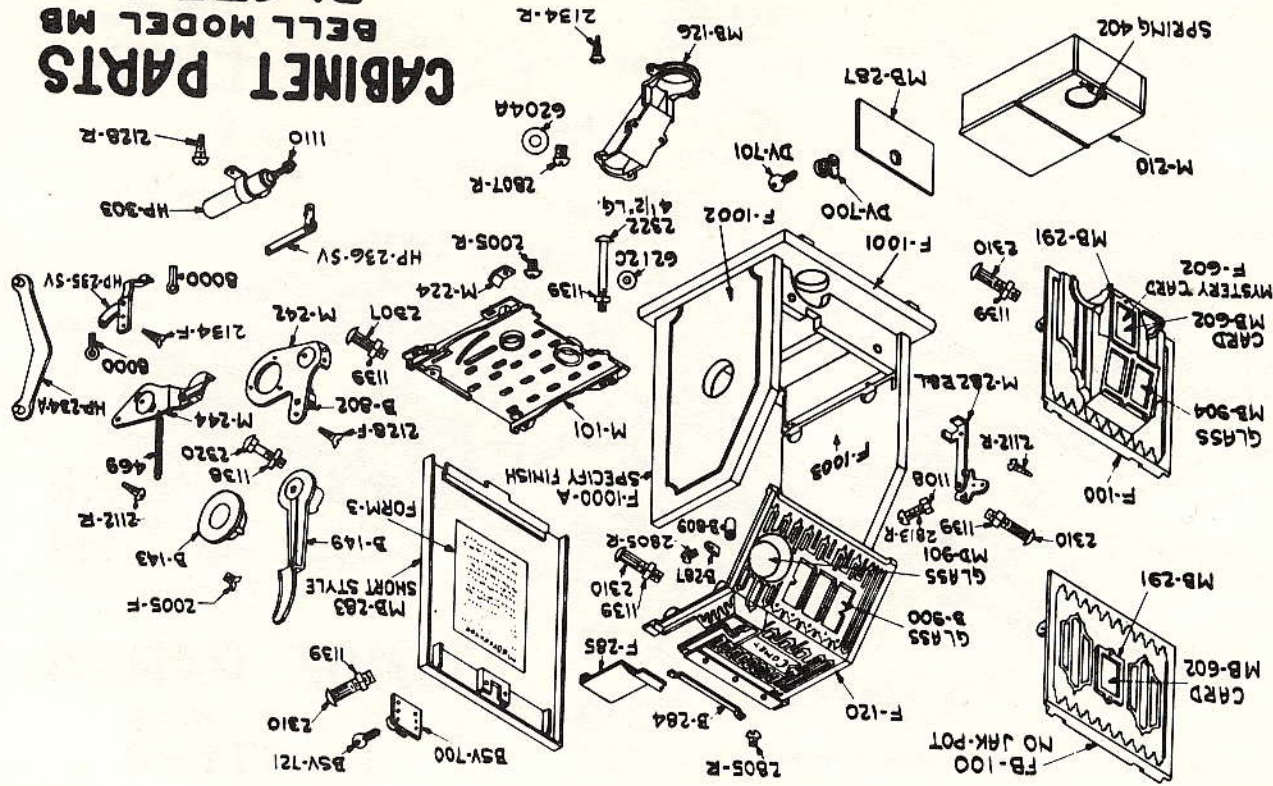

DON'T forget that PACE uses the best materials obtainable in their products. All parts are designed for strength and specially hardened where there is a chance for wear.

DON'T forget that you have the best machine of this type that money can buy. Treat it fairly and your profits will astound you.

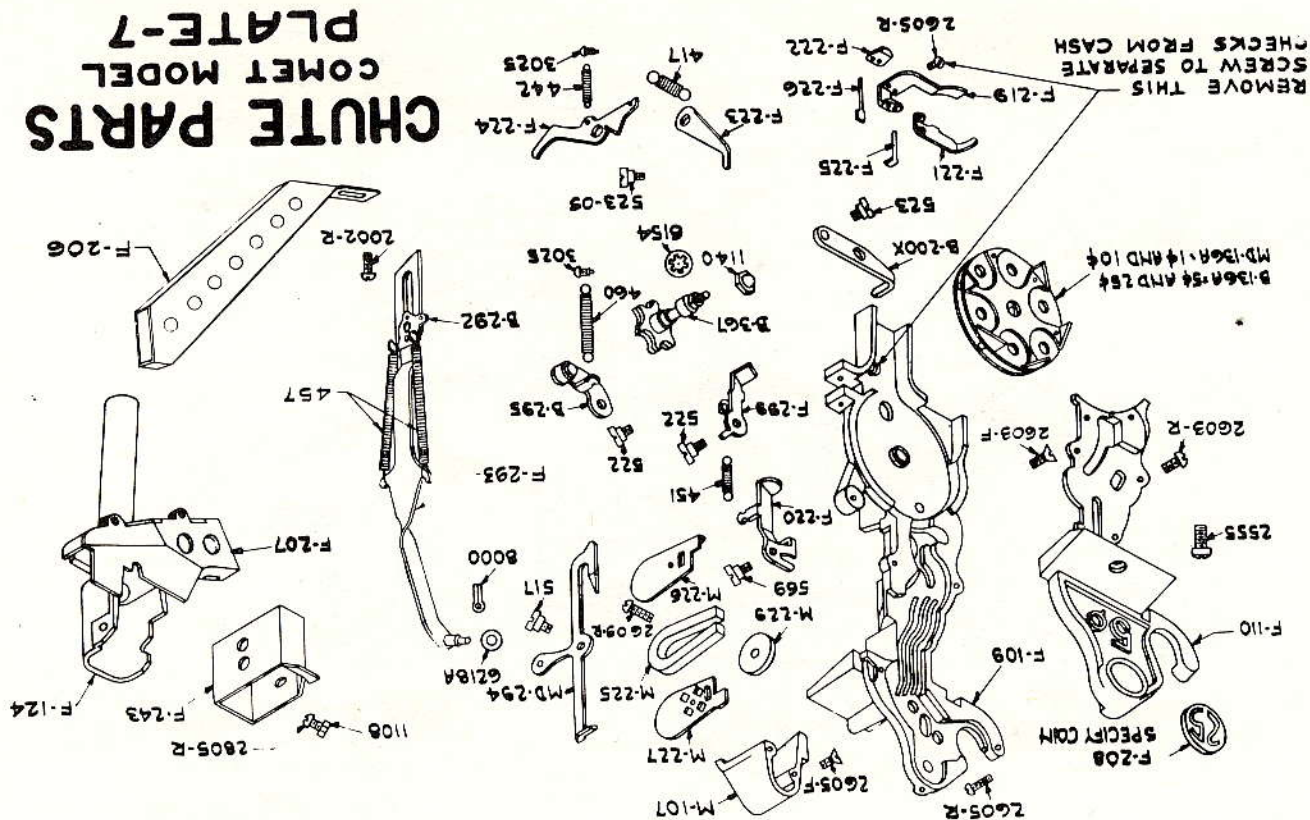

DON'T forget that when you want equipment that will give you uninterrupted service —

THE PACE "ARISTO" SCALE

*Has Made Scale
Operating Profitable*

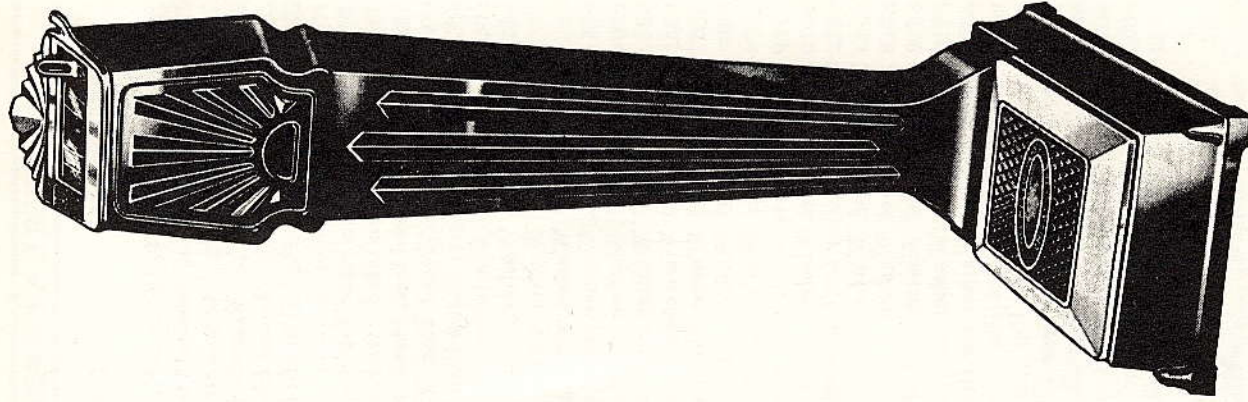

Upon examining the PACE "ARISTO" SCALE you are immediately impressed by the simplified construction of the mechanism and platform assembly. The foremost designer and engineer of coin-operated equipment in the world has, in the "ARISTO" SCALE, reached the ultimate. Special attention is given to every part used in the mechanism, with the view of making every part simple, yet strong enough to withstand all strain to which they are subjected. The exclusive construction of the dash-pot shock absorber is one feature that is especially valuable. A heavy man can jump on the platform of the scale with no damage to the mechanism.

The dial has a simple safety lock, which assures only one weight being given on the insertion of one coin. In other words, two persons cannot be weighed for one coin. A specially designed dial with large black numerals lithographed on a white enamel background assures easy reading of the weight of the person on the scale. The simplest adjustment used on any scale built today enables the operator to quickly and easily set the scale for correct weight, should adjustment be necessary. The exclusive Pace non-clogging coin-chute is so designed that any foreign matter that will pass through the coin slot will go through the coin-chute to the base without injury to the mechanism. Free weight cannot be obtained by blowing of the breath, or bouncing, etc.

Furnished in four beautiful porcelain colors: Red, Green, Black or White.

Pace sells more Scales than all other manufacturers combined.

Sold on our usual money back guarantee.

Price far below that of any similar scale ever offered in the history of the industry.

THE TOUGHEST PROTECTION EQUIPMENT ANY HIJACKER WILL EVER MEET

**AND WE CAN
